INTERESTS

Playing basketball, drinking Coffee (primarily cold brew), Reading (compound effect), Foods That Are Traditional

EMPLOYMENT & EXPERIENCE

FIZAZI & ASSOCIATES   Morocco, Tangier
Front end developer   *September 2023-current*

- I lead the development of a user-friendly platform aimed at simplifying risk management and performance tracking. Leveraging **Vue.js** and **Vuetify** for frontend design and **Nest.js** with **PostgreSQL** for backend functionality, the platform offers intuitive and robust features. Users can effortlessly identify risks, track performance, collaborate with their teams, and stay informed through alerts and notifications. Additionally, the platform integrates analytics charts and tools to analyze data, providing valuable insights for informed decision-making.

Pagie portal   Morocco, Tangier
Front end developer   *April- September 2023*

- I developed the frontend of a planning system ERP **Saas** tool (Planfy) using **Vue.js, Vuetify** framework, and **Pinia** for efficient state management. Responsibilities included UI design, responsive layout implementation, and performance optimization.
- I deployed the application to the Cloud using **AWS**, ensuring scalability and reliability. Responsibilities included configuring infrastructure, setting up deployment pipelines

Sand Circle SARL   Morocco, Tangier
Full stack Node.js developer   *January– march 2023*

- In overseeing frontend development, I employed **Nuxt.js**, **Quasar** framework, and **Pinia** to ensure a smooth and responsive user interface experience
- On the backend, I employed Nest.js and **PostgreSQL** to build scalable server-side solutions with robust data management capabilities. Subsequently, orchestrating Dockerization and deploying the application to **AWS Cloud** underscored my commitment to seamless scalability and reliability, bolstered by automated deployment pipelines.

Petalens SARL   Morocco, Tangier
Full stack Laravel/Vue.js developer   *January– August 2022*

- I spearheaded the development of a Media monitoring and social listening tool. This involved frontend work using **Vue.js**, **Vuetify**, and **Vuex** to ensure a sleek user interface. On the backend, I implemented **Laravel** API, **JSONAPI**, and **Postgresql** for robust data management and efficient communication between components.
- I led the development of a landing page using **Express.js**, serving as the application stack. This platform enabled the client to effectively showcase their services and business features, ensuring a seamless and engaging user experience.

CHAKIR group   Morocco, Tangier
Full stack Laravel developer   *September- Decembre 2021*

- In my role as a full stack web developer, I undertook the full stack development of a Dashboard. Using **Vue.js** for frontend development, **Laravel API** for backend functionality, and **MySQL** for database management, I ensured a seamless and responsive user experience. Additionally, I handled the maintenance of legacy Laravel code, ensuring its reliability and compatibility with the latest technologies.

Internship final year project   Morocco, Tangier
Full stack Laravel developer   *April- July 2020*

- In my role as a full stack web developer, I undertook the full stack development of a Dashboard. Using **Vue.js** for frontend development, **Laravel API** for backend functionality, and **MySQL** for database management, I ensured a seamless and responsive user experience. Additionally, I handled the maintenance of legacy Laravel code, ensuring its reliability and compatibility with the latest technologies.

EDUCATION & CERTIFICATIONS

Faculty of Sciences and Technologies   Morocco, Tangier
Diploma Bachelor of Science in Computer Engineering   *2019 – 2020*
